ABOUT TERMSTOP

Termstop is an Australian owned company committed to manufacturing quality products for the construction industry. We develop, test and manufacture our products in Australia using quality local raw materials

OUR CLIENTS

We understand that our products have offer to great value to pest managers, that's why they are high quality, easy to use and, with correct maintenance, will keep working year after year. All Termstop products can be bought without paying an annual training or license fee. Refer to the manual.

RETICULATION

Reticulation systems have been used to protect buildings for many years, however most systems are difficult to handle and install. Termstop Reticulation is a precision drilled flexible hose which delivers a pesticide to create a treated zone around the buildings. The flexible hose means that installation can be done quickly and easily with a minimum number of fittings

Pipe clipped high on footing

Pipe clipped low on footing

EASY INSTALLATION

Flexible hose means fewer fittings and quicker installation.
Radial hole pattern means easier hose placement.

LOW PRESSURE CHARGING

No need for pressure Charging
No need for special high performance pumps
Better soaking action into the soil

COMPLIES TO AS3360

Termstop Reticulation and Termite Shields are deemed to satisfy product under AS 3660

CONVENIENT KITS

Termstop reticulation is supplied in convenient 80m full hose kits or 10m handy kits
Termite Shields come in 100mm, 80mm, 50mm, and 40mm.

CUSTOMER VALUE

Termstop Reticulation is ideal for new building work, it offers all the benefits of a chemical barrier with the simplicity of replenishing at any time in the future without destructive trenching. Termstop Reticulation is also ideal for use in post construction termite treatments. Simply lay the reticulation line while the trench is open and replenish the barrier as part of the ongoing management of the property.
